EcoVadis Gold: MAHLE ranks among the top 1 percent of automotive suppliers

- EcoVadis has recognized MAHLE with a Gold rating for its sustainability performance for the second time
- Increase of 6 points to 88 out of a possible 100 points, further improving its previous performance
- Improvement across all four assessment areas: Labor & Human Rights, Environment, Sustainable Procurement, and Ethics
- Sustainability is an integral part of the Group strategy MAHLE 2030+

MAHLE has received the EcoVadis Gold Medal for its sustainability performance for the second time. With 88 out of a possible 100 points, the MAHLE Group improved its score by 6 points compared with the previous year. This places the technology group among the top 1 percent of automotive suppliers. MAHLE achieved improvements across all four assessed areas: Labor & Human Rights, Environment, Sustainable Procurement, and Ethics. The result reflects the implementation of the sustainability goals as part of the MAHLE 2030+ Group strategy. EcoVadis is one of the world's leading independent providers of corporate sustainability ratings.

"For MAHLE, sustainability is not only a social responsibility but also an important factor in long-term competitiveness. The EcoVadis result shows our customers, business partners, and employees that we systematically integrate environmental, social, and ethical requirements into our processes," said Georg Dietz, Member of the MAHLE Group Management Board and responsible, among other areas, for Sustainability, Environmental Management and Occupational Safety.

"The further improvement is the result of the joint efforts of numerous teams around the world. They have continued to develop our processes across the areas assessed by EcoVadis and, in doing so, made a significant contribution to this achievement," said Kathrin Apel, Director Corporate Sustainability and Occupational Health, Safety and Environmental Management at MAHLE.

MAHLE has further expanded its sustainability activities in recent years and has continuously improved its EcoVadis rating. Key factors contributing to the current result include advances in supply chain management and the successful participation in the audit program of the Responsible Supply Chain Initiative (RSCI). Collaboration with suppliers of critical raw materials has been further strengthened.

EcoVadis independently assesses the environmental, social, and ethical performance of more than 175,000 companies of all sizes across 250 industry categories and more than 180 countries. About MAHLE

MAHLE is a leading international development partner and supplier to the automotive industry with customers in both passenger car and commercial vehicle sectors. Founded in 1920, the technology group is working to shape the climate-friendly mobility of tomorrow, with a focus on the strategic fields of electrification and thermal management as well as further technologies to reduce carbon emissions, such as fuel cells and highly efficient internal combustion engines that can also run on biofuels, hydrogen or synthetic fuels.

MAHLE generated sales of €11.3 billion in 2025. Employing some 64,000 people at 127 production locations and 11 technology centers, the company is represented in 28 countries. (as at: 12/31/2025)
