Stuttgart, June 25, 2025

MAHLE and TecMotive become service partners

- In addition to technical support, the collaboration also includes product training and instruction
- MAHLE expands service for workshop equipment in Germany and Austria
- Service network doubles in size, enabling even faster response to customer inquiries

MAHLE Lifecycle and Mobility has entered into a partnership with TecMotive GmbH to further expand the service for its workshop equipment in Germany and Austria. By collaborating with this independent customer service provider, MAHLE is doubling the size of its service network and will therefore be able to respond even faster to customer inquiries. The partnership will focus on selected products from the MAHLE range. These include A/C service units, diagnostic systems, transmission flushing units, and equipment for calibrating ADAS systems. Product training and instruction as well as support for emissions testers are also included in the service package.

“As we continue to expand our range of workshop equipment and successfully place it on the market, the volume of service work is also increasing,” said Felix-Matthias Walter, Director Global Service Solutions at MAHLE Lifecycle and Mobility. “The combination of technical expertise, fast response times, and genuine customer proximity makes TecMotive an ideal partner that specifically complements and strengthens our existing service network.”

“We are delighted that MAHLE has placed its trust in us and given us the opportunity to put our many years of expertise into service for this strong brand,” said Christian Gabler, Managing Director of TecMotive GmbH. “Our technicians are ideally equipped to provide the workshops with competent support—whether by phone, remote access, or directly on site. Our commitment is clear: We want to create real added value and help workshops operating with MAHLE equipment to work efficiently and successfully.”

Workshops in Germany, Austria, and Switzerland can reach MAHLE centrally via the hotline +49 1806 115599, and will then be forwarded to the regional service partners.

About MAHLE Lifecycle and Mobility

MAHLE Lifecycle and Mobility is the spare parts and service business unit of the MAHLE Group. It supplies global partners in trade, workshops, engine repair shops, and e-commerce. The established offering serves the entire product life cycle of a vehicle along the MAHLE strategic fields of electrification, thermal management, and efficient, sustainable combustion engines. MAHLE Lifecycle and Mobility uses the expertise from the series production of the MAHLE original equipment business. The MAHLE Service Solutions business segment also develops products for workshop equipment, such as vehicle diagnostics, battery or A/C service, and offers technical support and individual training offers.

MAHLE Lifecycle and Mobility has more than 30 locations and additional sales offices in 23 countries with more than 2,060 employees. In 2024, the business unit recorded a sales volume of €1.3 billion globally. (Last edited: 12/31/2024).

About MAHLE

MAHLE is a leading international development partner and supplier to the automotive industry with customers in both passenger car and commercial vehicle sectors. Founded in 1920, the technology group is working on the climate-neutral mobility of tomorrow, with a focus on the strategic areas of electrification and thermal management as well as other technologies to reduce carbon emissions, such as fuel cells and highly efficient, clean combustion engines that also run on renewable fuels, such as hydrogen. Today, one in every two vehicles globally is equipped with MAHLE components.

In 2024, MAHLE generated sales of €11.7 billion. With almost 68,000 employees at 135 production locations and 11 technology centers, the group is represented in 28 countries (as of 12/31/2024).
