Stuttgart, July 17, 2025

MAHLE invests in global knowledge transfer

- MAHLE Lifecycle and Mobility expands its range of training courses for trading partners, workshops and fleet operators
- Managing Director Philipp Grosse Kleimann: "With the Global Training Center in Stuttgart, the worldwide expansion of our refined training structure begins."
- Advanced training under practical workshop conditions
- Training portal combines technical knowledge across the entire MAHLE aftermarket portfolio

MAHLE Lifecycle and Mobility is expanding and restructuring its range of training courses. "The need to create opportunities for advanced training for technicians in workshops and employees in wholesale is increasing," said Philipp Grosse Kleimann, member of the MAHLE Management Committee and Head of MAHLE Lifecycle and Mobility. "With the inauguration of our new Global Training Center in Stuttgart, we have successfully begun the worldwide expansion of our refined training structure." The facility has over 1,300 sqm of training space, five fully equipped workshop workstations and offers enough space to train up to 15 partners simultaneously under practical conditions. MAHLE will use the Stuttgart model to set up new training centers in other countries, such as France and Italy. The improved training structure also includes the MAHLE training portal. Interested parties can use this online platform to book training courses but additionally access technical user knowledge across the entire MAHLE portfolio – from spare parts to workshop equipment. "We see ourselves as a supplier of spare parts and workshop equipment, but also as a strong partner for the workshops with a comprehensive package of solutions that combines consulting, service and training," said Philipp Grosse Kleimann.

The growing influx of alternative drive types, such as battery-electric or hybrid vehicles, in the independent spare parts market is extending the scope of tasks in workshops to include vehicle diagnostics, cooling circuit maintenance, and work on battery systems. This is the reason why MAHLE spare parts and service division chose the strategic location of the training center right next to the technology group's development and test center for traction batteries. "At MAHLE

Lifecycle and Mobility, we are increasingly utilizing our internal competence to respond early to future developments in the independent spare parts market,” said Felix-Matthias Walter, Director Global Service Solutions at MAHLE Lifecycle and Mobility. “We are actively looking for proximity to workshops and wholesalers to find out where the greatest need for further training lies.”

Suitable for every situation

The improved MAHLE training portal is expanding the range of training courses for workshops as well as service providers and offers targeted and flexible opportunities for advanced training for every knowledge level. Technicians and wholesale partners can choose between free live online training courses, in which qualified trainers are directly available for questions and exchange, and short e-learning courses to impart basic knowledge or provide more in-depth technical knowledge. In addition, visitors to the portal can book face-to-face trainings quickly and easily and access over 120 technical documents such as damage brochures or oil quantity manuals. The training offer is available in German, English, Polish, and Portuguese. More languages are currently being prepared.

The training portal can be accessed online at www.training.mahle.com.

The wide range of training courses provided by MAHLE is supporting workshops, fleet operators, and trading partners in acquiring new skills and therefore getting prepared for the future.

MAHLE is focusing on e-mobility and diagnostics in the expansion of its training program.

The new Global Training Center in Stuttgart enables technicians to receive advanced training in a practical workshop environment.

About MAHLE Lifecycle and Mobility

MAHLE Lifecycle and Mobility, the spare parts and service business unit of the MAHLE Group, supplies partners in trade, workshops, engine repair shops, and e-commerce worldwide. The proven product range covers the entire product lifecycle of a vehicle along the MAHLE strategic fields of electrification, thermal management, and efficient, sustainable combustion engines. MAHLE Lifecycle and Mobility uses the expertise from original equipment series production. In addition, the MAHLE Service Solutions business segment develops products for workshop equipment, such as vehicle diagnostics, battery or air conditioning service, and offers technical support and individual training programs.

MAHLE Lifecycle and Mobility operates out of more than 30 locations and additional sales offices in 23 countries with more than 2,060 employees. In 2024, the business unit generated a global sales volume of EUR 1.3 billion. (as at: 12/31/2024)

About MAHLE

MAHLE is a leading international development partner and supplier to the automotive industry with customers in both passenger car and commercial vehicle sectors. Founded in 1920, the technology group is working on the climate-neutral mobility of tomorrow, with a focus on the strategic areas of electrification and thermal management as well as further technologies to reduce carbon emissions, such as fuel cells or highly efficient, clean combustion engines that also run on renewable fuels, such as hydrogen. Today, one in every two vehicles globally is equipped with MAHLE components.

MAHLE generated sales of €11.7 billion in 2024. Employing just under 68,000 people at 135 production locations and 11 technology centers, the company is represented in 28 countries. (as at: 12/31/2024)
